

Central BioHub®
Biomaterials Online

sample as that

Make things as simple as possible, but not simpler. A. Einstein

Central BioHub conducts the largest online marketplace for human biomaterials. As a supplier, you have the unique opportunity to offer your human biospecimens directly or as OEM partner on www.centralbiohub.com. Any questions or issues that arise before or after a purchase can be dealt with our experienced scientific support team. Your biospecimens can be presented with all sales- and user-relevant specifications. We will support you with standardisation of your sample data and a technical solution for the upload. The customers will find the specimens they need comfortably in no time using our clearly designed filter functions and product overview. You can also associate each of your specimens with specific disclaimers to ensure correct use.

- Access to customers in the pharmaceutical, bioanalytical and academical field worldwide
- We handle the marketing for your human biospecimens - online and offline
- Customer-friendly filter functions and product overview
- Restrict the use of your biospecimens in accordance with the donor-intended purposes
- The interface function solution to upload your specimen data to our marketplace will be provided

Every supplier has the possibility to store their specimens at our cold storage site. **Central BioHub** cooperates with a reliable partner organisation with 20 years of experience in cold storage and human biospecimen logistics increasing the expertise available for our suppliers. **Central Logistics** ships your stored samples and handles customs duty and other aspects of your delivery worldwide.

- Shipping and handling (e.g. packaging, transport, insurance, customs) will be at the expense of the customer
- Professional cold storage sites offering storage temperatures from 4 °C to -130 °C
- Benefit from our experience in worldwide delivery and dealing with customs duty

Central BioHub has established a validation system, which provides an objective basis to decide on the quality of samples. Alongside with the assessment of biomaterial quality, the ethical and legal aspects concerning the donation of different human biospecimens are of high importance to us and must be absolutely transparent to the customer and public. Inter alia, we supply you with legally verified informed consent forms and any other written information to be provided to subjects, which can be changed according to your requirements.

Central BioHub stands up for the WMA Declaration of Helsinki as a statement of ethical principles for medical research involving human subjects including research on identifiable human material and data and for the WMA Declaration of Taipei on Ethical Considerations regarding Health Databases and Biobanks. To reach the highest ethical and legal standards, we work with various renowned medical law firms all over Europe. In this way, you can avoid expensive and time-consuming individual assessments during preparation of documents.

- Certification service to support you with every aspect of accomplishing highest quality and ethical standards
- Cooperation with different renowned medical law firms
- Supply with legally verified informed consent material

Our range of services simplifies your daily working routine, facilitates a significant quality enhancement and increases your customer base. **Central BioHub** offers a comprehensive service including cold storage, logistics, marketing and legal support - as simple as possible, as secure as necessary. Together, we contribute to progress in life science research and achieve an improvement in patient care.

simple as that - sample as that
